Princess Roni Egbu

Fullstack Developer

Lagos, Nigeria | +234 913 748 9008 | ronniiiip@gmail.com | Portfolio | GitHub | LinkedIn

PROFILE

Fullstack developer who designs and builds complete web systems from the database to the interface. Recent work centres on multi-tenant workplace platforms using React, Next.js, NestJS and PostgreSQL. Comfortable owning architecture, access control and production concerns end to end. B.Sc. Software Engineering, Babcock University (July 2026, Second Class Upper, CGPA 4.43/5.00).

FEATURED PROJECT

Clasp Workspace

Apr 2025 to Present

Personal project, deployed | *Next.js, NestJS, Prisma, PostgreSQL* | *claspworkspace.work.gd*

- Designed and built a multi-tenant organisation and management system that lets separate companies run isolated workspaces on one shared platform.
- Implemented tenant isolation with a shared PostgreSQL database and row-level security so each company only ever sees its own data.
- Modeled a multi-table PostgreSQL schema with Prisma and implemented role-based access control across four tiers (Admin, HOD, Lead, Staff) using custom NestJS guards and JWT authentication.
- Created a module system covering eight departments so each department gets its own screens and workflows instead of one fixed layout.
- Added invitation flows, account status controls and admin tools with safeguards against privilege escalation.
- Tested list and search performance on seeded datasets of more than 10,000 records, with median response times under 50 milliseconds on indexed, paginated queries.

WORK EXPERIENCE

Freelance Fullstack Developer

2024 to Present

- Delivered 2 fullstack and 2 frontend web applications for independent clients under NDA, owning architecture, database design and deployment end to end.

Frontend Developer, Ezrillee Solutions Limited

Jul 2025 to Sep 2025 | Lagos

- Shipped new React pages and components for an existing product by reverse-engineering the undocumented styling system and matching the live visual language.
- Owned page structure, responsiveness and integration with the company REST API across multiple new screens.

Frontend Developer, GN128 Solutions

Jan 2025 to Jun 2025 | Lagos

- Delivered frontend work across 8 projects in a fast agency setting. Independently built 6 applications end to end using mock APIs designed for later backend integration, and contributed to 2 team projects (team of 4).
- Modernised the frontend structure of 2 legacy CRM platforms.

Frontend Intern, Consode Digital Limited

Sep 2023 to Nov 2023

- Built UI modules for a live SaaS product and managed application state with Redux.

Intern, ITSkillsCenter

Sep 2021 to Mar 2022 | Lagos

- Created 40+ reusable UI components in HTML, CSS and JavaScript for a no-code website builder.

RESEARCH AND NLP PROJECTS

Requirements Generator from User Stories

2026

Research Project (Supervisor Collaboration)

- Built a system that reads free-form user stories and extracts actors, goals and conditions to generate structured software requirements.
- Used Rasa and an offline NLP library for entity extraction and intent classification.

Real-Time Voice Call Translation System

2026

Final Year Project, Babcock University

- Engineered an end-to-end, zero-API-dependency voice translation pipeline: custom Voice Activity Detector, ASR (faster-whisper), Machine Translation (Helsinki OPUS-MT) and TTS (PiperTTS).

- Designed for real-time performance using entirely offline models running on local hardware.

EDUCATION

B.Sc. Software Engineering, Babcock University 2023 to 2026 | Ogun, Nigeria

Second Class Upper (2:1), CGPA 4.43/5.00

- Graduate Member, Computer Professionals Registration Council of Nigeria (GMCPN).
- Developer on the Babcock University Computer Club, building and maintaining internal tools.
- Active in GDG on Campus. Completed a Generative AI certification covering LLM integration and prompt engineering.

SKILLS

FRONTEND	React, Next.js, TypeScript, JavaScript, Tailwind CSS
BACKEND	NestJS, Node.js, Prisma, PostgreSQL, REST APIs
OTHER	Python, Docker, Git, Vercel, Render

COMMUNITY

Facilitator, Girls in Tech Nigeria Jul 2023 to Present

- Run practical coding sessions for beginners and mentor participants through their own projects.
